# Certificates & Awards

## Certificates & Awards Document For Colop's Quality Standard And Services

MORE THAN 90% OF ALL PRODUCTS IN THE COLOP STAMP RANGE

**CO2 neutral**

As early as during product development, attention is paid to resource conservation and the use of sustainable materials. The use of recycled plastics is constantly optimised and increased, and energy and raw materials are used as efficiently as possible. The in-house photovoltaic system produces a considerable part of the electricity required at the Wels site. The significantly reduced but unavoidable CO2 emissions of products - manufactured at one of the two production sites in Wels, Austria or Borovany, Czech Republic - are offset by investments in climate protection projects. This means that more than 90 % of all products in the COLOP stamp range can be described as climate neutrals.
